

Spring Preview

We don't know about you, but this cold weather, leaves us longing for spring! We can't wait to trade our winter coats, five extra layers and snow boots for some light and airy spring fabulousness. As new collections hit the stores, we are already dreaming up outfits, so we decided to post a little preview of the looks we're looking forward to wearing this spring!

Safari

Think tan leathers, subtle animal prints, and expedition worthy silhouettes, such as belted linen blouses in tans and greens, and cargo knee length skirts with pockets and pleats. The key to this look is to bring the feel of open air adventure without looking like you just did a mile walk through the jungle. Stick to one special piece, like a linen jacket or blouse and pair with dark jeans and some wooden accessories. Or do a cargo skirt with a fitted tank, and cropped jacket or sweater and brown leather wedges. A neutral trench paired with similar tones of browns or greens, is a great way to modernize the look. Add a punchy orange or yellow accessory and you're set to go. If you want to just do a subtle safari touch, a weathered leather belt or bracelet can do the trick!

Retro

Something Retro is always in, and we love it! This spring it's all about the vintage prints, sorbet colors, 40's style pumps and, high waisted trousers. So, if you bought some wide leg, high-waisted denim this fall, don't pack it away quite yet, pair them with a printed chiffon blouse and a pair of low heeled leather pumps and you've got the look down. Also, look for geometric print dresses in colors from a vintage

beach postcard, just make sure the print is no bigger than an orange, especially if you're petite! To add just a touch of this look, add a silky scarf in a subtle peach or yellow to a bag, t-shirt or use it as a head band and you've got instant Retro appeal.

Spring Suiting

Finally, you won't have to attempt to stuff that suit jacket into your coat sleeve, and show it off in its un-rumpled glory! Spring suit silhouettes have shown up in beautiful pearl inspired iridescent colors and slinky pencil high waisted cuts. Pair them with a muted lemon yellow or silver gray blouse or cashmere sweater and you're all set to transition to a dinner on the town. Sheer chiffon blouses in warm coral hues will finally bring a sun kissed glow to your face, and will look fabulous under a lightweight gray or taupe suit, pair with 2-toned pumps to add some texture and the office won't seem so drab anymore! For just a subtle touch, add some colorful stone or bead jewelry to an all black ensemble or throw in a bright purse or shoe, and your suit is instantly transformed!
